Bob Kirk, one of the best fellows living on the North Saline in Graham county, and breeder of fine cattle, was trading with our merchants last Saturday. Refreshments were served, and old and young danced till the wee sma' hours of the morning, and all report it the most enjoyable gathering given on the Saline for many a day.

About twenty years ago a Mr. Grant took a homestead in the Stimits neighborhood, broke up a lot of prairie and planted an orchard. He tried farming for several years, came to the conclusion that this wasn't a farming country, and moved back to near Topeka from whence he came. Last Tuesday a son of the above named gentleman dropped into this office and said he was born in a sod house about fourteen miles southwest of town about nineteen years ago and inquired the way to Mr. Stimit's. He said his father advised him to come out west, look up a good watered claim and he would start him in the cattle business. The boy's father says he sees now where he made a mistake, had he stayed here and engaged in the cattle business he would be better off financially to-day—although he is in good circumstances.

Birthday Dinner.
On Saturday, August 12, there gathered at the residence of John Brown in Gove county, quite a number of old soldiers and friends to celebrate his birthday. Of course the most notable event was the sumptuous dinner provided. With a table spread for about thirty and goodies enough for one hundred, the old boys in blue saw hopelessness of taking all before them. But with undaunted courage they waded in, and in the battle that followed the crack of jokes could be heard on all sides. Being an eye witness of the affray (maybe I did eat a little) I could but think of the time when they met in their more youthful days, and it is pleasing to know that this grand nation appreciates the services then done and wishes them many happy birthdays and bounteous dinners.

Ogallah Items.
(By Shiner.)
Ogallah is just booming now—we do not want for lack of news this week. H. M. Davidson is putting up a grain elevator, and Mr. Samuels is laying the foundation for a new store building, both the elevator and store are on the north side of the Ogallah crossing. Opposition is the spice of trade. Charlie Lofsted is doing the carpenter work for Mr. Davidson and several other men are helping. Chas. Thornton has been hauling lumber from Wa-Keeney and several loads of stone and have been hauled into town for numerous purposes, and Mr. Samuels will have a well dug, the machine is right here ready to commence; and Mr. Samuels undertook to put up a tent Wednesday evening but the wind blew too strong so down it came. W. H. Thornton is putting up an addition of a kitchen, and Mr. Kelso is the boss carpenter. Another family arrived in town with six children to reside in the Tarry house while the father works on the section. And they tripped the light fantastic toe at Mike Richard's Friday evening. And our Sunday school was very interesting Sunday, and next comes the camp meeting commencing the 17th of August near Mr. Harrison's. Miss Leona Thornton and friend visited Benson last week, and Mrs. C. Marquand was calling in Ogallah Sunday. Benson Brothers are putting up a large quantity of feed now and will winter 200 head of cattle. Threshing has commenced. The Yetter House was filled with boarders the past week. Tom Roberts has purchased a new wagon, and that isn't all there'll soon be a wedding. Mr. Martin of Topeka was here on business Wednesday.

Valuable Foreign Seeds.
Mr. Jared Smith, one of the grass experts of the Department of Agriculture, states that the Department has received some seeds which may prove interesting to Western farmers. They are mostly from the arid region of Siberia and Russian Turkestan, country in many respects resembling the arid regions of the West. Among them are hairy vetch, which is drought and also cold resistant, a variety of winter rye which is especially hardy and drought resistant, oats, and two or three kinds of winter wheat. Most of these seeds are thought to be suitable to climates having extremes of temperature, and the Department is willing to supply free trial lots to farmers desiring to test them. Some of the Turkestan alfalfa, which is thought to be very drought resistant, is also available.
\$100 Reward, \$100.
The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of Testimonials.

Hall's Family Pills are the best.
"Scarcely a day passes," says the editor of the Horton Leader, "but some one with a grievance requests us to rip some one up the back. We don't rip. Who ever heard of any body tearing their shirt and making enemies just to help an editor out of trouble or to defend him from an attack of some kind. Nobody! If you are badly used, have the manhood to fight your own battles. Editors have learned by experience that individuals whose axes they grind, often use those axes to chop the stuffing out of the editor. If you have anything to say to a man through the medium of the press, take it to the editor, put your name on it, pay for the space the same as the merchant does, and let her go Gallagher; but don't ask the editor to father your grievance."
